## INSTRUCTIONS FOR Ladder Roof Rack Clamps

Stock No.24807

Part No.LRC

**IMPORTANT:** PLEASE READ THESE INSTRUCTIONS CAREFULLY TO ENSURE THE SAFE AND EFFECTIVE USE OF THIS PRODUCT.

Assemble components as shown above to make two rack clamps (padlock not included).

Always use rack clamps in pairs, one at the front and one at the rear of the vehicle.

Pass the threaded hook down through the ladder and under the roof rack bar. Spin the handle down the thread clamping the tube down on to the ladder until the ladder is held secure and cannot move.

Do not overtighten as this will result in damage to both your roof rack and the rack clamp.

Regular lubrication of thread will prolong the life of the clamp.
