DRAPER®

GENERAL INFORMATION

These instructions accompanying the product are the original instructions. This document is part of the product, keep it for the life of the product passing it on to any subsequent holder of the product. Read all these instructions before assembling, operating or maintaining this product.

This manual has been compiled by Draper Tools describing the purpose for which the product has been designed, and contains all the necessary information to ensure its correct and safe use. By following all the general safety instructions contained in this manual, it will ensure both product and operator safety, together with longer life of the product itself. All photographs and drawings in this manual are supplied by Draper Tools to help illustrate the operation of the product. Whilst every effort has been made to ensure the accuracy of information contained in this manual, the Draper Tools policy of continuous improvement determines the right to make modifications without prior warning.

3. GUARANTEE

3.1 GUARANTEE

Draper tools have been carefully tested and inspected before shipment and are guaranteed to be free from defective materials and workmanship.

Should the tool develop a fault, please return the complete tool to your nearest distributor or contact Draper Tools Limited, Chandler's Ford, Eastleigh, Hampshire, SO53 1YF. England. Telephone Sales Desk: (023) 8049 4333 or Product Helpline (023) 8049 4344.

A proof of purchase must be provided with the tool.

If upon inspection it is found that a fault occurring is due to defective materials or workmanship, repairs will be carried out free of charge. The guarantee period covering parts/labour is 12 months from the date of purchase. This guarantee does not apply to normal wear and tear, nor does it cover any damage caused by misuse, careless or unsafe handling, alterations, accidents, or repairs attempted or made by any personnel other than the authorised Draper warranty repair agents.

Note: If the tool is found not to be within the Terms of Warranty, repair and carriage charges will be quoted and made accordingly.

This guarantee applies in lieu of any other guarantee expressed or implied and variations of its terms are not authorised.

Your Draper guarantee is not effective unless you can produce upon request a dated receipt or invoice to verify your proof of purchase within the guarantee period.

Please note that this guarantee is an additional benefit and does not affect your statutory rights. Draper Tools Limited.

4. INTRODUCTION

4.1 SCOPE

4 watt Chip On Board (COB), 1W LED and 3 UV LED rechargeable inspection lamp, 4W COB to be used as an inspection lamp and 1 LED or 3 UV LED for use as a torch. Magnets on the base and on the rear, two 360° swivel hooks. Base pivots 180°, supplied with mains charger and 12V charger.

4.2 SPECIFICATION

Stock nos.....80962, 80964, 80965, 80966

Part nos..... RIL/COBV2/BL, RIL/COBV2/OR, RIL/COBV2/GR, RIL/COBV2/YW

Battery:

Type Li-Ion

Rated Voltage 3.7V

Rating 2.6Ah

Charger:

Rated Voltage 230V~

Rated Frequency 50Hz

Rated Power Input 5W

Rated D.C. Output Voltage 5V DC

Rated D.C. Output Current 1000mA

Construction Class II

Charging time..... 5 hrs (approx.).

Lamp operating time:

4W COB LED inspection lamp..... 3 hrs (approx.).

1W LED torch..... 8 hrs (approx.).

3 UV LED's torch..... 28 hrs (approx.).

Lamp luminosity:

4W COB inspection lamp.....350 lumens.

1W LED torch.....80 lumens.

4.3 HANDLING & STORAGE

Do not drop the inspection lamp as this can damage and shorten the life span of the unit.

Store in a dry location as damp conditions can damage the inspection lamp.

Charging on a regular bases in advised to prolong the life of the battery cells.

5. HEALTH & SAFETY INFORMATION

5.1 GENERAL SAFETY INSTRUCTIONS

General Power Tools Safety Warnings

WARNING: Read all instructions. Failure to follow

all instructions listed below may result in electric shock,

fire and/or serious injury.

Save all warnings and instructions for future reference.

The term "power tool" in the warnings refers to your

mains operated (corded) power tool or battery operated

(cordless) power tool.

1) Work area safety

a) **Keep work area clean and well lit.** Cluttered or

dark areas invite accidents.

b) **Do not operate power tools in explosive**

atmospheres, such as in the presence of flammable

liquids, gases or dust. Power tools create sparks

which may ignite the dust or fumes.

c) **Keep children and bystanders away while**

operating a power tool. Distractions can cause you

to lose control.

2) Electrical Safety

a) **Power tool plugs must match the outlet.** Never

modify the plug in any way. Do not use any

adapter plugs with earthed (grounded) power

tools. Unmodified plugs and matching outlets will

reduce risk of electrical shock.

b) **Avoid body contact with earthed or grounded**

surfaces such as pipes, radiators, ranges and

refrigerators. There is an increased risk of electric

shock if your body is earthed or grounded.

c) **Do not expose power tools to rain or wet**

conditions. Water entering a power tool will

increase the risk of electric shock.

d) **Do not abuse the cord. Never use the cord for**

carrying, pulling or unplugging the power tool.

Keep cord away from heat, oil, sharp edges or

moving parts. Damaged or entangled cords

increase the risk of electric shock.

e) **When operating a power tool outdoors, use an**

extension cord suitable for outdoor use. Use of a

cord suitable for outdoor use reduces the risk of

electric shock.

f) **If operating a power tool in a damp location is**

unavoidable, use a residual current device (RCD)

protected supply. Use of an RCD reduces the risk of

electric shock.

3) Personal Safety

a) **Stay alert, watch what you are doing and use**

common sense when operating a power tool. Do

not use a power tool while you are tired or under

the influence of drugs, alcohol or medication. A

moment of inattention while operating power

tools may result in serious personal injury.

b) **Use personal protective equipment. Always wear**

eye protection. Protective equipment such as dust

mask, non-skid safety shoes, hard hat, or hearing

protection used for appropriate conditions will

reduce personal injuries.

c) **Prevent unintentional starting. Ensure the switch is**

in the off position before connecting to power

source and/or battery pack, picking up or carrying

the tool. Carrying power tools with your finger on

the switch or energising power tools that have the

switch on invites accidents.

d) **Remove any adjusting key or wrench before**

turning the power tool on. A wrench or a key left

attached to a rotating part of the power tool may

result in personal injury.

e) **Do not overreach. Keep proper footing and**

balance at all times. This enables better control of

the power tool in unexpected situations.

f) **Dress properly. Do not wear loose clothing or**

jewellery. Keep your hair, clothing and gloves

away from moving parts. Loose clothes, jewellery

or long hair can be caught in moving parts.

g) **If devices are provided for the connection of dust**

extraction and collection facilities, ensure these are

connected and properly used. Use of dust

collection can reduce dust related hazards.

4) Power Tool Use And Care

a) **Do not force the power tool. Use the correct power**

tool for your application. The correct power tool

will do the job better and safer at the rate for

which it was designed.

b) **Do not use the power tool if the switch does not**

turn it on and off. Any power tool that cannot be

controlled with the switch is dangerous and must

be repaired.

c) **Disconnect the plug from the power source and/or**

the battery pack from the power tool before

making any adjustments, changing accessories, or

storing power tools. Such preventive safety

measures reduce the risk of starting the power tool

accidentally.

d) **Store idle power tools out of the reach of children**

and do not allow persons unfamiliar with the

power tool or these instructions to operate the

power tool. Power tools are dangerous in the

hands of untrained users.

e) **Maintain power tools. Check for misalignment or**

binding of moving parts, breakage of parts and

any other condition that may affect the power

tools operation. If damaged, have the power tool

repaired before use. Many accidents are caused by

poorly maintained power tools.

f) **Keep cutting tools sharp and clean.** Properly

maintained cutting tools with sharp cutting edges

are less likely to bind and are easier to control.

g) **Use the power tool, accessories and tool bits etc.,**

in accordance with these instructions, taking into

account the working conditions and the work to

be performed. Use of the power tool for operations

different from intended could result in a hazardous

situation.

5) Battery tool use and care

a) **Recharge only with the charger specified by the**

manufacturer. A charger that is suitable for one

type of battery pack may create a risk of fire when

used with another battery pack.

b) **Use power tools only with specifically designated**

battery packs. Use of any other battery packs may

create a risk of injury and fire.

c) **When battery pack is not in use, keep it away from**

other metal objects, like paper clips, coins, keys,

nails, screws or other small metal objects, that can

make a connection from one terminal to another.

Shorting the battery terminals together may cause

burns or a fire.

d) **Under abusive conditions, liquid may be ejected**

from the battery; avoid contact. If contact

accidentally occurs, flush with water. If liquid

contacts eyes, additionally seek medical help.

Liquid ejected from the battery may cause irritation

or burns.

6) Service

a) **Have your power tool serviced by a qualified**

repair person using only identical replacement

parts. This will ensure that the safety of the power

tool is maintained.

5. HEALTH & SAFETY INFORMATION

5.2 CONNECTION TO THE POWER SUPPLY (CHARGERS)

Make sure the power supply information on the machine's rating plate are compatible with the power supply you intend to connect it to.

This lamp comes supplied with a UK standard 3 pin transformer. It is designed for connection to a domestic power supply rated at 230V AC.

It is Class 2 (double insulated); is designed for connection to a power supply matching that detailed on the rating label and compatible with the plug fitted.

If an extension lead is required, use an approved and compatible lead rated for this appliance. Follow all the instruction supplied with the extension lead.

This product requires no earth connection as supplementary insulation is applied to the basic insulation to protect against electric shock in the event of failure of the basic insulation.

6. TECHNICAL DESCRIPTION

6.1 IDENTIFICATION

7. UNPACKING & CHECKING

7.1 PACKAGING

Carefully remove the inspection lamp from the packaging and examine it for any sign of damage that may have happened during shipping. If any part is damaged or missing; please contact the Draper Helpline (the telephone number appears on the Title page) and do not attempt to use the lamp.

Warning! Some of the packaging materials used may be harmful to children. Do not leave any of these materials in the reach of children.

If any of the packaging is to be thrown away, make sure they are disposed of correctly; according to local regulations.

8. PREPARING THE INSPECTION LAMP

8.1 CHARGING - FIG.1

Connect the charging plug into the charging socket (③), which is located on the rear of inspection lamp. Connect the 230V charger or 12V DC charger to a power supply and turn it on.

The charging LED indicator (⑨) will illuminate red, charge for 5 hours or until the charging LED illuminates green.

Disconnect the charger from the inspection lamp when it is fully charged.

9. OPERATING THE INSPECTION LAMP

9.1 OPERATION - FIG.2

CAUTION: Never shine the LED light directly into your or any one else's eyes.

To run through the sequence of modes (3 UV LEDs, 1 Watt LED, 4 Watt COB and off).

Press the on/off (⑦) button.

The lamp can be suspended and swivel 360° on hooks (①) or the magnets (②) and (④) located on the rear on base of the lamp.

10. MAINTENANCE

Keep the inspection lamp clean from dirt and grease, using a damp cloth.

Do not submerge in water.

11. EXPLANATION OF SYMBOLS

11.1 EXPLANATION OF SYMBOLS

Class II construction (Double insulated).

130°C Non-Self-Resetting protective device.

WEEE Do not dispose of Waste Electrical & Electronic Equipment in with domestic rubbish

Short-circuit-proof safety isolating transformer.

For indoor use only. Do not expose to rain.

Polarity indication.

12. DISPOSAL

12.1 DISPOSAL

- At the end of the machine's working life, or when it can no longer be repaired, ensure that it is disposed of according to national regulations.

- Contact your local authority for details of collection schemes in your area.

In all circumstances:

- Do not dispose of power tools with domestic waste.
- Do not incinerate.
- Do not abandon in the environment.
- Do not dispose of WEEE* as unsorted municipal waste.

* Waste Electrical & Electronic Equipment.
